

Cuyahoga Falls Fire Department

Annual Report

2015

Cuyahoga Falls Fire Department **2015 Annual Report**

2015 was the busiest year the Fire Department has seen in its 178 years. After a decade of averaging 7,766 calls per year, 2015 showed 8,377 calls for service, an increase of 7.3%. Not a new type of call, nor heavily increased in a given area, but increased across all call types.

In 2015, the Cuyahoga Falls Fire Department continued to provide the highest quality of professional emergency service to our community. This was done within a framework of empathy, compassion and dedication to the citizens we serve. The Fire Department promises to continue to review and renew every aspect of its service, maintaining a model of continuous improvement, to deliver only the best to our community.

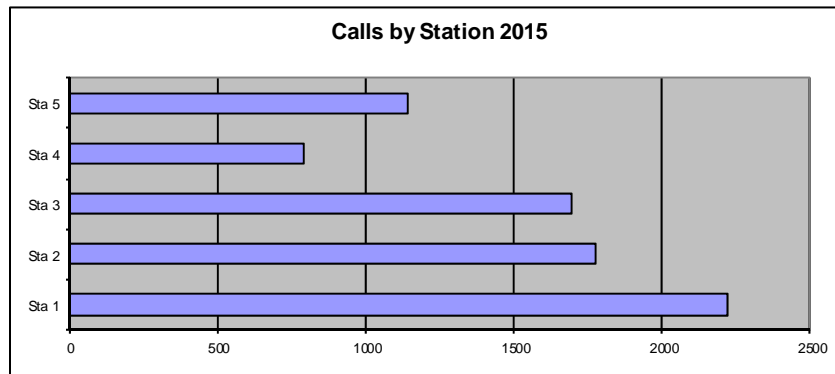

The Cuyahoga Falls Fire Department was quick to respond to all calls for assistance in 2015 and will continue to keep the city safe in 2016. The Fire Department has provided continuous service to the citizens of Cuyahoga Falls since 1837, and the Village of Silver Lake since 2008.

With an average response time of 4 minutes and 32 seconds to all calls and 4 minutes and 16 seconds to all emergency calls. The Cuyahoga Falls Fire Department is 60% better than the national average of 10 minutes. Response time improved over 2014, as call volume increased.

Responding quickly is only part of the service; taking care of the citizen is the greater responsibility. Our customer service philosophy is simple; treat each person as you wish to be treated. The well being of a patient is as vital to their recovery as being

treated medically or rescued from a threatening situation. This Department receives letters regularly thanking the crews for the extra step they took in a patient's care such as locking up the house, calling a relative, or just being nice. Our quick response, combined with well-trained medical and fire skills and great customer service, has made the difference between life and death for many members of this community.

Station 1 remains the busiest in the City of Cuyahoga Falls. The 2015 district response numbers are reflected below.

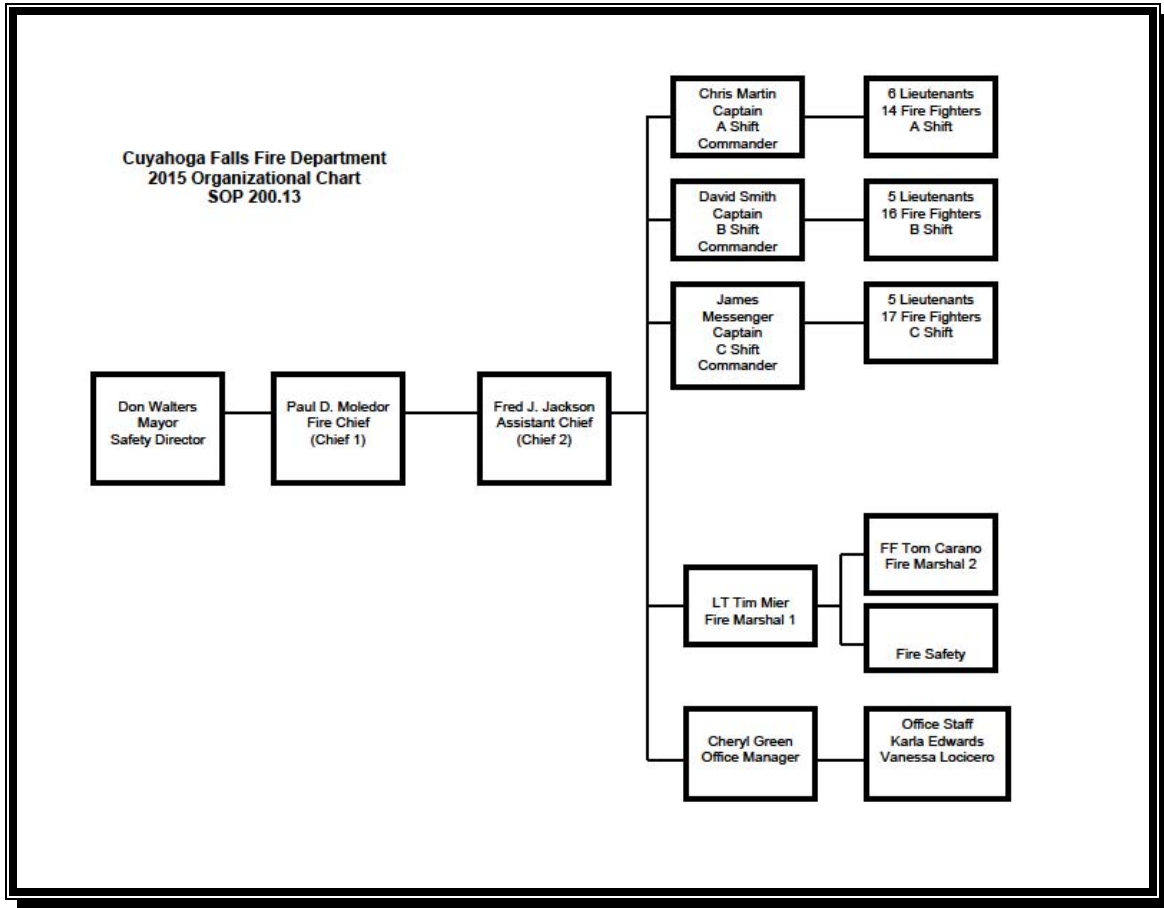

The Cuyahoga Falls Fire Department maintains mutual aid agreements with surrounding communities and an automatic aid agreement with Akron. In 2015, The Cuyahoga Falls Fire Department delivered mutual/automatic aid 83 times, while receiving mutual/automatic aid 47 times. Mutual and automatic aid continues our efforts to improve service through regional cooperation and sharing of resources. This valuable asset is priceless in providing resources, not needed daily, for the unusually busy moments or large events.

Another fine presence that Cuyahoga Falls Fire Department has in the community is the Honor Guard, which stands ready to honor retirees and the fallen. In 2015, the Honor Guard marched in the Memorial Day Parade.

The Fire Department is organized as below.

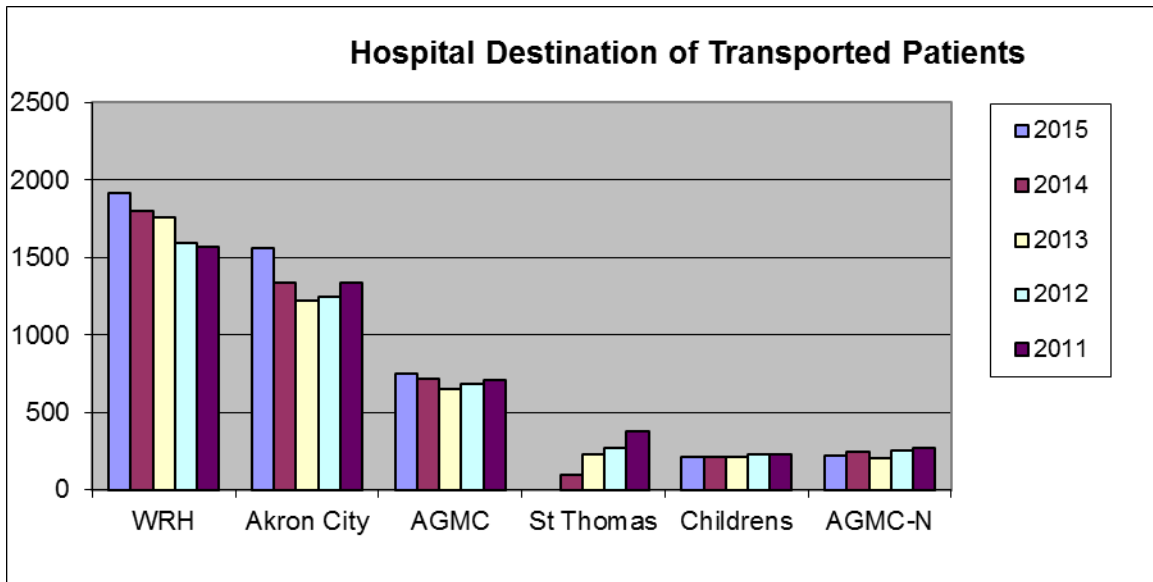

Five new firefighters were hired, three members were promoted to Lieutenant, one Lieutenant to Fire Marshal, and one firefighter to Deputy Fire Marshal.

The Department conducted four upper level National Incident Management System courses for personnel.

Emergency Medical Service

One of the major functions of the Cuyahoga Falls Fire Department is to provide Emergency Medical Service. In 2015, **5,640 EMS incidents accounted for 78% of the total incidents**. The aspects of EMS are multi-faceted; in-the-field triage, the administration of medication and/or medical treatments, and emergency transportation to a local hospital when the symptoms indicate. As a result of EMS incidents, **4,657 patients were transported to various facilities in 2015. More than \$1.4 million of revenue was generated by ambulance billing for the city.**

Patients were transported to their hospital of choice as listed below.

Under the medical direction of Dr. Michael Beeson, the Cuyahoga Falls Fire Department operates from an aggressive, standing order driven protocol, based heavily on the discretion and judgment of paramedics on the scene. To prepare our medics, Dr.

Beeson and his staff provide monthly continuing medical education, including a review of EMS calls and a lecture series.

In addition, Fire Department members are provided specialty training including Advanced Cardiac Life Support, Basic Life Support, Pediatric Life Support and Basic Trauma Life Support. All paramedics also participate in an innovative, on-line CME training known as 24/7. Topics provide medics with curriculum tied to the monthly CME lectures and include a written test for each topic. The Fire Department, along with Dr. Beeson, assists the police department in meeting medical direction for the City Jail.

The past three years, Western Reserve Hospital conducted regular monthly training to assist our paramedics in providing the best possible pre-hospital care. In addition to in-house training, WRH provided topic experts in various areas of medicine.

This year, the Department paramedics began training on the skills necessary to address the tragic situations created by an active shooter in a public place. This training was conducted in conjunction with our Police Department.

Envelope of Life

The Fire Department was involved in the development and implementation of the Envelope of Life program. This program was brought forward after a plan from Mayor Walters to make medical information readily available not only to households, as well, place that information in vehicles, making the medical information much more available during an emergency.

Electronic Charting and New Protocol

Preliminary setup and development was completed to “Go Live” January 01 with Pre-Hospital Electronic Charting. This program is the beginning of full integration of patient data from time of 911 call to handoff at the hospital.

A completely new Paramedic protocol with the newest available medications was completed, trained to, and implemented. This protocol was created with Dr. Michael Beeson, Akron General Medical Center, and the Cleveland Clinic. This is now embedded in the electronic charting system, increasing efficiency and helping to deliver the highest level of care.

Fire Service

Another major function of the Department is to provide fire/rescue-related services. Engines and/or ladder trucks reside at all five stations, prepared with equipment to provide the best level of service to our citizens. Every incident presents a different challenge for a fire fighter. The Cuyahoga Falls Fire Department continues to train in various venues to ensure members maintain necessary skills. For example, community geography is studied, Self-Contained Breathing Apparatus methods reviewed, and ladder evolutions are conducted. Firefighter safety and fire command topics are trained regularly. Every month, training is posted with a specific reading assignment and drills to be conducted. Specific incidents are reviewed to learn from the experiences, and specialized training is conducted in rope rescue, confined space, trench, collapse, Hazardous Materials, and water rescue tactics. In all, the training conducted by the Fire Department exceeds the State requirements and all members maintain firefighting and paramedic certifications.

In 2015, the Cuyahoga Falls Fire Department responded to \$9,505,250 worth of property involved in fire, of that 80.75% was saved, for a value of \$7,675,610 of property and businesses saved from the ravages of fire.

Fire Prevention and Education

Fire losses continue to remain low across all occupancies. The community involvement of firefighters and fire prevention members has served as a mechanism for keeping fire losses low in our community. Tragically, there was one fire fatality in 2015.

Fire Prevention still remains the most effective method for reducing fires across the United States and also remains the most effective way of reducing firefighter injuries and deaths. This is supported by the National Fire Protection Association (NFPA) and the National Institute of Standards and Technology (NIST).

Continued openings at Portage Crossings was not without a lot of effort from fire prevention members. They were involved in plan review, the installation, testing and final inspections for fire protection equipment, and they established relationships with the many new business owners now operating in our city. As development around the City continues, so does our involvement with creating a proactive participation with that development.

Blossom Music Center remains a considerable focus of the Fire Prevention Bureau. Every year the Fire Marshal meets with the senior staff of Blossom to review and discuss the coming year's events. The Fire Marshal and staff deal with live performances involving fireworks and pyrotechnical effects. To ensure public safety, many hours of preparation are required for a successful event. The preparation includes review of the types of devices to be used in a performance. If during review and testing it is determined that the pyrotechnic effect may pose a risk to the public, it is removed from the show.

The roles of fire prevention are varied and unique to our City, and members continue to expand their knowledge to stay current on the issue facing public safety. We will continue to work at using prevention as an effective tool for a safe community.

Fire companies were responsible for **1899 commercial inspections during 2015**. The fire companies perform these inspections for several reasons. Most importantly, company inspections allow the firefighters to be familiar with the building layout, increasing their survivability in a fire and their ability to rescue those in need. Additionally, inspections reduce the potential for fire, and limit the fire growth and development by removing unsafe practices and hazards. The company inspection program also allows us to place emphasis on targeting areas in need of additional support to help the business owners maintain a safe, valuable business.

These companies also installed over 138 smoke detectors in homes across the City and Silver Lake.

Recently retired Fire Marshal Michael Dunton received a tremendous honor and recognition from the Ohio Department of EMS as the “Ohio Fire Prevention Educator of the Year 2015”.

Fire Marshal Dunton receiving his award in Columbus from Mr. Born of the Ohio Department of EMS.

Community Events

The Fire Department continues to support life safety initiatives by providing the Safety Town Program, with the assistance and support of other City Departments, businesses, and citizens. This program teaches 200 in-bound kindergarten students many safety lessons they will carry through life.

In 2015, the Fire Department, with tremendous partnering from other City Departments, private business, citizens, and Western Reserve Hospital, conducted the fourth annual First Responders Appreciation Day. This event was created to recognize the many men and women in uniform for the service they provide both domestic and foreign. The event drew over 5,000 persons to a family-friendly, fun event on the mall.

Special Operations Teams

The City of Cuyahoga Falls has many special hazards that require the specific and specially trained response of the Special Operations Teams. These hazards include industrial confined spaces and chemicals, cliffs in the Gorge Park, construction trenches, various impoundments, and the swift waters of the Cuyahoga River. The members of the Cuyahoga Falls Fire Department Special Operations Teams responded to various calls in 2015. These responses include: searches for lost persons, rescue of persons from stalled elevators, rescue of persons from swift or icy waters, investigation of Hazardous Materials incidents, and SWAT Medical events.

Swiftwater training and continuing education was conducted to safely provide care for persons in peril in the river.

In addition to the responses within the City, Cuyahoga Falls Fire Department members also participated with the Summit County Special Operations Team.

Grants

The Cuyahoga Falls Fire Department actively researches grant opportunities. In the past 10 years, more than \$1 million has been awarded to the Fire Department by various private organizations and governmental agencies. Grants are utilized to purchase state-of-the-art equipment and supplies.

The Fire Department administration worked throughout the year to complete all required information for a disaster recovery grant from the State of Ohio with tremendous help from all other City Departments. This helped cover most of the cost for over \$1 million of uninsured loss from the flooding in May 2014.

Silver Lake

Since 2008, the Cuyahoga Falls Fire Department has been delivering Fire/EMS /Rescue service to the Village of Silver Lake, and installing smoke detectors upon request. The Village of Silver Lake contracts with the City of Cuyahoga Falls for this service.

197 Silver Lake Calls in 2015

- 2 Fire/Explosion, Overheat
- 113 EMS
- 12 Good Intent
- 15 False Alarms
- 4 Hazardous Condition
- 51 Miscellaneous Service Calls

Conclusion

In 2015, the Cuyahoga Falls Fire Department provided the highest quality of professional emergency service to our community. This was done within a framework of empathy, compassion and dedication to the citizens we serve. The Fire Department promises to continue to review and renew every aspect of its service to deliver only the best to our community, while keeping it safe in 2016.
